Welcome Address

Dear Colleagues,

The European Society of Pathology (ESP) and the Swedish Society of Pathology are delighted to welcome you to the 38th European Congress of Pathology (ECP 2026) at Stockholmsmässan.

ECP 2026 brings together more than 5,000 participants from all over the world – pathologists, clinicians, researchers, molecular biologists, bioinformaticians, medical scientists, and industry partners. The meeting will provide an ideal opportunity for professional development, networking, to exchange insights, and will demonstrate the commitment of the ESP to contributing to Pathology progress in the near future.

Sweden's medical heritage is deeply rooted in its institutions like the Karolinska Institute, home to the Nobel Assembly, and Radiumhemmet. Early staging efforts at Radiumhemmet are recognised as influential precursors of structured staging frameworks like FIGO and TNM. Today, Swedish molecular pathology is internationally respected for its integration of pathology, genomics, and precision oncology.

Swedish institutions are key players in translational research, biomarker-driven treatment planning, and cutting-edge immuno-oncology studies.

The motto of the congress – **"Innovation Driving Excellence in Pathology"** – acknowledges the significant improvement that pathology innovation has brought and continues to bring to diagnostics, assessment of prognosis and therapy response prediction and clinical practice. The excellent programme prepared by the ESP working groups, ESP-affiliated societies, education and trainee committees, and other collaborating societies includes keynote lectures, slide seminars, symposia, and interactive workshops, from internationally renowned speakers and leaders in their fields. There will be a special focus on digital pathology, AI integration, and emerging technologies that are transforming our field.

We are delighted to welcome you to Stockholm!

About ESP

The European Society of Pathology (ESP), established in 1963, has its headquarters in Brussels and is the leading European force in Pathology with more than 6,500 active members, 25 Working Groups (WG) and affiliated Societies and 30 national pathology societies.

ESP organises the European Congress of Pathology (ECP) annually, holds several virtual and on-site postgraduate courses each year, among others through the European School of Pathology, ESP Academy, Masterclasses, and has an official journal "Virchows Archiv".

ESP interacts with national pathology societies in Europe and has a significant number of established collaborations with other European organisations, clinical and scientific associations, and international pathology societies.

The ESP Foundation provides external quality assessment (QA) programmes for several biomarkers. Diagnostic laboratories worldwide participate in the ESP Foundation QA, such as Lung and Colon.

Emma Lundberg, USA

Emma Lundberg

At the interface between bioimaging, proteomics, and artificial intelligence, Emma Lundberg's research aims to define the spatiotemporal subcellular organization of the human proteome, and to build integrated models of human cells to understand how variations in protein expression patterns can contribute to cellular function and disease.

She is an Associate Professor of Bioengineering and Pathology at Stanford University. For the past 18 years, she has been a Director of the Human Protein Atlas project, creating an open-access image resource for millions of researchers worldwide. She advocates for open science and has a strong interest in science communication, both to scientific audiences and the public through innovative media. She has been secretary general of the Human Proteome Organization, and is involved in advisory roles for many cell mapping efforts such as the Human Cell Atlas consortium, UniProt db, Reactome db, Human Proteome Project and Pharma Companies.

As a token of her leadership skills, she was twice recognized as top 10 under 40 for future leaders in biopharma and omics. She is excited to continue to leverage advances in AI to build image-based spatial models of cells and be part of shaping the next era of spatial biology and pathology.

CME Accreditation

The 38th European Congress of Pathology, Stockholm, Sweden has been accredited by the European Accreditation Council for Continuing Medical Education (EACCME®) with **24 European CME credits (ECMEC®s)**.

Each medical specialist should claim only those hours of credit that he / she actually spent in the educational activity. A link will be sent to all delegates on 17 September, through which credits can be claimed after completing the congress evaluation form.

Through an agreement between the Union Européenne des Médecins Spécialistes and the American Medical Association, physicians may convert EACCME® credits to an equivalent number of AMA PRA Category 1 CreditsTM.

Information on the process to convert EACCME® credit to AMA credit can be found at **https://edhub.ama-assn.org/DocumentLibrary/edhub/applications/eaccme-application.pdf**

Live educational activities, occurring outside of Canada, recognised by the UEMS/EACCME® or ECMEC®s are deemed to be Accredited Group Learning Activities (Section 1) as defined by the Maintenance of Certification Program of the Royal College of Physicians and Surgeons of Canada.

How to get around

From Stockholm Arlanda Airport, you can easily reach Stockholmsmässan by public transport. Take the SL commuter train (pendeltåg) from Arlanda Central (SkyCity) to Älvsjö Station — the journey takes approximately 47 minutes, and Stockholmsmässan is just a short walk from the station.
For the fastest connection from Arlanda Airport to central Stockholm, take the Arlanda Express train to Stockholm Central Station in just 18 minutes.

How to get to the Congress Centre

By train

Stockholm is well connected by rail, with frequent national and international services arriving at Stockholm Central Station, the city's main hub. High-speed SJ trains link Stockholm with major Swedish cities such as Gothenburg, Malmö, and Uppsala, while long-distance routes connect from Copenhagen and Oslo. From Central Station, reaching Stockholmsmässan is easy: simply take the commuter train (pendeltåg) toward Södertälje or Tumba and get off at Älvsjö Station, just a 10-minute ride away. Stockholmsmässan is located directly next to the station, making the final transfer quick and convenient.

By car

Stockholm can be reached via major highways such as the E4 from the north and south and the E18 from the west. To get to Stockholmsmässan, follow signs toward Älvsjö and the exhibition centre, which is situated just south of central Stockholm. The venue offers several parking areas on-site, and clear signage along the approaching roads makes it straightforward for drivers to find the convention centre.

By taxi

When using taxis in Stockholm, it is advisable to choose well-known and reputable companies such as Taxi Stockholm, Taxi Kurir, or Sverigetaxi, as pricing among operators is not regulated and can vary significantly. Always check that the car displays clear pricing information on the yellow fare sticker on the window and confirm the approximate cost with the driver before starting your journey.

In the main entrance, Stockholmsmässan has clear signs indicating which taxi companies they cooperate with. We recommend that you choose one of these companies. Only these companies are permitted in the designated zone.
